***REASON FOR ALLOWANCE***

1. The primary reason for allowance over related U. S. Pat. No. 6,644,325, is that the method of the '325 patent, applicant claims a method of scarifying a sewer, where a nozzle arm, with a nozzle attached to the end thereof, is pivoted in a direction "transverse", to the direction of travel of the vehicle supporting the nozzle arm, whereas in the instant application, the nozzle arm is pivoted in a direction "parallel" to the direction of travel of the vehicle supporting the nozzle arm. Therefore the movement of the vehicle, with respect to the "transverse" pivoting direction, is forward and backward as claimed. The movement of the vehicle, with respect to the "parallel" pivoting direction, is forward only. The allowance over related U. S. Pat. No. 6,550,486 (incorrectly typed as 6,550,485 in the Final Rejection of Feb. 23, 2006) is permitted because the conflict with the claims in the '486 patent has been rendered moot, by the filing of the Terminal Disclaimer on April 24, 2006.
